ACADEMIC QUALIFICATIONS

I Was done my B. Tech(civil) in 2019 from Vikas group of institutions with the aggregate of 64%

PROJECTS:

Title : Taskgator
Testing Approach: Manual
Role : Software Test Engineer

Description:

A peer to peer market place software that is simple, powerful and customizable. Taskgator is bundled peer to peer market place software that enables you to get started with your online service market place website or app. The providers who wants to get their job or task done need to post their job on the Taskgator. Taskgator further suggest them the takers that are qualified to do that job along with providing other information such as hourly rates, experience etc. The task poster later selects one tasker that he finds most appropriate. The provider can accept or cancel the job as per his availability and convenience. Once the tasker completes the tasks, the payment process is handled securely using this software.

Roles & Responsibilities:

- ❖ Understanding Test Requirements and Functional Specifications of the application
- ❖ Involved in all phases of Software Testing Life Cycle which includes Requirement Analysis, Test Planning, Test data creation and Test Case Preparation
- ❖ Identifying Required Test Scenarios and designing the Test cases
- ❖ Prepare and Execute the test cases as per System Requirements
- ❖ Involved in all testing related documentation
- ❖ Identify the Defects and Maintaining the bug Reports for defect tracking.
- ❖ Analyzing Test Results and Test Reporting
- ❖ Prepare the different types of reports like Test execution reports, Test summary reports ,Test closure Reports and RTM
- ❖ Effectively participation in the status meetings.

DECLARATION.

I hereby declare that the above particulars are true to the best of my knowledge & belief.
